

Technical Guide

HortiTop High N 18-3-6+1MgO+3SO₃

HortiTop Complete 11-5-12+1MgO+3SO₃

Slow release top-dressing fertiliser for container-grown trees and shrubs
Provides hungry, tired plants with rapid recovery from hard times

HortiTop High N has been developed for use from spring to July to boost growth and improve leaf colour of container-grown nursery stock.

HortiTop Complete has been developed to provide sustained and steady feeding of container-grown nursery stock, perennials and pot plants.

Organic content	40% including natural trace elements
Organic N	2%
IBDU N	11%
Urea N	5%
Organic P ₂ O ₅	1%
Inorganic P ₂ O ₅	2%
Organic K ₂ O	3%
Inorganic K ₂ O	2%
MgO	1%
SO ₃	3%

Organic content	45% including natural trace elements
Organic N	2%
Nitrate N	2%
IBDU N	3%
Ammoniacal N	4%
Organic P ₂ O ₅	1%
Inorganic P ₂ O ₅	5%
Organic K ₂ O	4%
Inorganic K ₂ O	8%
MgO	1%
SO ₃	3%

Application rates for both High N and Complete

	Top dressing Grams/litre of growing media	Broadcasting grams/m ²
Sensitive species	0.5 to 1.0	30 to 50
Moderate vigour species	1.0 to 1.5	50 to 75
Strong growing species	1.5 to 2.5	75 to 150

When broadcasting, apply to dry plants to avoid adhesion of granules to the foliage.
Agitate plants lightly after application to shake granules out of foliage and onto the surface.
Do not broadcast over rosette forming species as the granules will lodge in the crown and may cause damage.

Use in combination with HortiWet advance in the irrigation to gain maximum effect and rapid recovery from hard times.
