Conditions of Supply:

All goods supplied by us are of high quality and we believe them to be suitable, but as we cannot exercise control over their storage, handling, mixing at use or of the weather conditions before during and after applications which may affect the performance of the goods, all conditions and warranties, statutory or otherwise as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us or re-sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling application at use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.

A high quality water soluble powder, specifically formulated for fertigation and liquid feeding in a variety of growing media. Extra Mix is for crops requiring higher levels of magnesium using hard water supplies.

Rates of Use:

Hortimix Extra Mix can be dissolved at the rate of 10 Kg per 100 litres stock solution to achieve a 10% Stock Solution. This can then be used at the correct dilution rate. For full recommendations and rates of use refer to Hortifeeds Technical Recommendations.
