

HortiFlush

Complete growing media conditioner

The complete growing media conditioner. Designed to help remove excess E.C. and dry patches.
Restores ideal growing conditions with natural biostimulation.

Application:

HortiFlush be used periodically in heavily fed crops with growing media with high E.C. levels. Use throughout the growing season when E.C. levels are higher than ideal. Always dilute in water and apply through the fertigation system. Ensure the product has fully dispersed before starting application.

For Use in Fertigation:

Apply HortiFlush on a stand-alone basis at 1ml/litre through the fertigation system. To achieve this, prepare a stock tank with 10 litres of HortiFlush per 100 litres of stock. Do not add fertilisers to the stock tank. Inject with the dosatron at 1:100 (1%) and apply to the growing media. Allow at least 30% run-off.
