

HortiTop

Slow-Release Top Dressing Fertilisers

Provide hungry, tired plants with rapid and sustained recovery during tough growing conditions.

HortiTop

HortiTop

Top dressing fertilisers for container-grown trees and shrubs.

HortiTop organo-mineral granules are designed to release nutrients gradually over around a three-month period. Containing nutrients in both organic and mineral form, they provide hungry plants with nutrition to aid rapid recovery from tough growing conditions, and then further sustained growth. The fertiliser granules stick to the compost surface and are not easily washed off by irrigation or displaced during handling.

This product is especially useful to replace CRF that might have been exhausted in roll over stock, readying it for sale.

Although specially developed for trees and shrubs in containers, HortiTop can also be used for soil grown crops.

A rose's top up feed after winter.

20 Kg

CROP

Application

Top dressing

Sensitive species- 0.5 to 1.0 grams/litre of growing media

Moderate vigour species- 1.0 to 1.5 grams/litre of growing media

Strong growing species- 1.5 to 2.5 grams/litre of growing media

Broadcasting (soil application)

Sensitive species- 30 to 50 grams/m²

Moderate vigour species- 50 to 75 grams/m²

Strong growing species- 75 to 150 grams/m²

For trees in very large pots of more than 50 litres, reduce the HortiTop application rate to a maximum of 0.75g/litre. Use in combination with HortiHydrate Pro in the irrigation to gain maximum effect and rapid recovery from hard times

Analysis

%w/w	HortiTop High N 18-3-6	HortiTop Complete 11-5-12	HortiTop High K 10-4-18
	Developed for use from spring to July, to boost growth	Provides sustained and steady feeding	Designed for use from spring to late autumn
