

HortiHydrate 500

An innovation in hydration

HortiHydrate 500 is a unique blend of non-ionic surfactants consisting of short, medium and long chained molecules. Enabling plants to grow faster, more uniformly and with less water, reducing production costs.

Application:

Add 160ml HortiHydrate 500 in 4 litres of water per m³ for fine grade mixes
Add 80ml HortiHydrate 500 in 4 litres of water per m³ for all other mixes

This should then be sprayed into 1m³ (1000 litres) of compost during mixing to ensure even distribution.
