Hortifeeds is unique
We are specialists in providing professional growers with a comprehensive service, covering all plant nutritional needs

Hortifeeds manufactures and supplies a wide range of high quality fertilisers and biostimulants to provide comprehensivenutrition and optimise yield and quality of fruit crops.
We can help create bespoke fertiliser programmes, provide water, substrate and soil analysis and advice on application rates and timings.

HortiMix
Soluble Fertiliser Fruit Range

Specially formulated soluble fertiliser blends provide complete nutrition to maximise yield and quality. Developed for fertigation and liquid feeding crops grown in coir and soil as well as other growing medias. Recipes tailored to specific substrate, water and crop to deliver optimum performance.

Use HortiMix soluble fertiliser for:
- Ease of use – save valuable time and labour
- Consistent nutrient delivery – avoid the risks of incorrect mixing
- Quality assurance – accredited precision blending using high quality materials
- Complete tailored nutrient packages available from fully qualified and experienced advisors

Specialist mixes designed for use in coir, peat and other substrates, with tailored formulations suitable for strawberries, raspberries and blueberries amongst other fruit crops.

Examples include:

5-13.5-26+ 6 MgO+TE	HortiMix Soft Fruit Coir Mix
6.5-12-31+ 5% MgO + TE	HortiMix Soft Fruit Peat Mix
10-10-14+ 4.3 MgO+TE	HortiMix Blueberry Soil Special
19-6-20+ 3.0 MgO+TE	HortiMix Blue

Plant Impact Amētros™
Calcium Mobility Enhancer

Mobilises calcium within crops using patented CaT Technology to boost fruit firmness and quality. Contains additional calcium to increase benefits. Prevents calcium disorders.
Designed for foliar application.

HortiBoost
The Complete Biostimulant

Comprehensive package containing seaweed, amino acids, humic acids and trace elements. Boosts healthy development and nutrient use efficiency. Aids recovery from stress events. Can be applied via foliar application or fertigation.

HortiPhyte
Phosphite Biostimulant

Fast acting phosphite fertiliser helps activate natural plant defences and improves rooting and establishment. Good levels of potassium helps budding and fruit yield. Designed for foliar application or drip fertigation.

HortiVitis
Trace Element Package

Specially formulated magnesium and trace element fertiliser for vines and other fruit crops to help maximise yield and quality and support crops through vital growth and development stages. Designed for foliar application.

HortiPhos
Concentrated Phosphorus

A readily absorbed phosphorus fertiliser also containing calcium and nitrogen. Phosphorus is essential for energy transfer, respiration and photosynthesis. With added calcium, HortiPhos enhances fruit quality and shelf-life.

HortiFol TF Bud
Bud Primer & Invigorator

A post-harvest or early spring fertiliser that supports both overwintering tree nutrient storage and spring growth. An ideal post-harvest feed to prime crops before the winter, it can also be used in spring to support new growth.

NuGro
NPK Bio-Fertiliser

Biologically based liquid NPK fertilisers providing good all-round levels of nutrition. Fast acting and formulated to stick to foliage and resist wash off, increasing uptake by the plant. Can be applied via foliar application or fertigation.

HortiHydrate Bio
Sustainable Wetter

Wetting agents help to improve water and nutrient use efficiency, reduce dry spots in substrate and reduce stress in heat and drought conditions. Environmentally friendly and certified for use in organic growing systems.

HortiChel
Trace Element Range

Full range of trace elements required for crop nutrition to maximise yields and correct deficiencies. Available in soluble and liquid formulations and with a range of chelating and complexing agents to suit specific growing conditions.
